40 SKILLS / 16 REPOS / 8 THEMES

UI & visual design

5 repos · 5 skills

GITHUB REPOSITORY anthropics/ **skills** – 1 skill in this theme

GITHUB REPOSITORY vercel-labs/ **agent-skills** – 1 skill in this theme

GITHUB REPOSITORY leonxlnx/ **taste-skill** – 1 skill in this theme

GITHUB REPOSITORY nextlevelbuilder/ **ui-ux-pro-max-skill** – 1 skill in this theme

GITHUB REPOSITORY pbakaus/ **impeccable** – 1 skill in this theme

SKILL 01 · START PICK · 1.0M installs
frontend-design
Build distinctive interfaces, landing pages and apps.
USE WHEN: Designing a new page or a major visual refresh.
EXAMPLE PROMPT: Build a distinctive landing page for this product.
INSTALL: `npx skills add anthropics/skills --skill frontend-design`
Skill details ↗ · anthropics/skills ↗

SKILL 02 · START PICK · 787.8K installs
web-design-guidelines
Audit UI, accessibility and interaction details.
USE WHEN: Reviewing an existing UI for usability and accessibility.
EXAMPLE PROMPT: Audit this page and list the most important UI fixes.
INSTALL: `npx skills add vercel-labs/agent-skills --skill web-design-guidelines`
Skill details ↗ · vercel-labs/agent-skills ↗

SKILL 03 · 682.4K installs
design-taste-frontend
Create polished landing pages and portfolios.
USE WHEN: Making a landing page or portfolio feel less generic.
EXAMPLE PROMPT: Give this portfolio a clear visual direction and polish.
INSTALL: `npx skills add leonxlnx/taste-skill --skill design-taste-frontend`
Skill details ↗ · leonxlnx/taste-skill ↗

SKILL 04 · 416.7K installs
ui-ux-pro-max
Choose styles, palettes and UX patterns for your stack.
USE WHEN: Choosing a coherent visual system for a product.
EXAMPLE PROMPT: Suggest a suitable palette, type scale and layout style.
INSTALL: `npx skills add nextlevelbuilder/ui-ux-pro-max-skill --skill ui-ux-pro-max`
Skill details ↗ · nextlevelbuilder/ui-ux-pro-max-skill ↗

SKILL 05 · 362.9K installs
impeccable
Critique, refine and polish production interfaces.
USE WHEN: Refining an interface through critique and polish.
EXAMPLE PROMPT: Critique this screen, then improve its three weakest areas.
INSTALL: `npx skills add pbakaus/impeccable --skill impeccable`
Skill details ↗ · pbakaus/impeccable ↗

React & components

3 repos · 5 skills

GITHUB REPOSITORY vercel-labs/ **agent-skills** – 2 skills in this theme

GITHUB REPOSITORY wshobson/ **agents** – 2 skills in this theme

GITHUB REPOSITORY shadcn-ui/ **ui** – 1 skill in this theme

SKILL 06 · START PICK · 841.8K installs
vercel-react-best-practices
Optimize React and Next.js performance.
USE WHEN: Investigating a slow React or Next.js application.
EXAMPLE PROMPT: Find avoidable waterfalls, heavy bundles and re-renders.
INSTALL: `npx skills add vercel-labs/agent-skills --skill vercel-react-best-practices`
Skill details ↗ · vercel-labs/agent-skills ↗

SKILL 07 · 419.7K installs
vercel-composition-patterns
Design flexible, reusable React components.
USE WHEN: Refactoring components with too many configuration props.
EXAMPLE PROMPT: Refactor this component into a composable React API.
INSTALL: `npx skills add vercel-labs/agent-skills --skill vercel-composition-patterns`
Skill details ↗ · vercel-labs/agent-skills ↗

SKILL 08 · 93.3K installs
typescript-advanced-types
Use generics, unions and type-safe API patterns.
USE WHEN: Designing reusable, strongly typed TypeScript APIs.
EXAMPLE PROMPT: Make this API type-safe without unnecessary complexity.
INSTALL: `npx skills add wshobson/agents --skill typescript-advanced-types`
Skill details ↗ · wshobson/agents ↗

SKILL 09 · 70.6K installs
tailwind-design-system
Build Tailwind tokens, themes and component variants.
USE WHEN: Standardizing Tailwind tokens and component variants.
EXAMPLE PROMPT: Extract reusable tokens and variants from these screens.
INSTALL: `npx skills add wshobson/agents --skill tailwind-design-system`
Skill details ↗ · wshobson/agents ↗

SKILL 10 · 124.1K installs
shadcn
Build and customize shadcn/ui components.
USE WHEN: Adding, theming or extending shadcn/ui components.
EXAMPLE PROMPT: Add a dialog that uses the existing project theme.
INSTALL: `npx skills add shadcn-ui/ui --skill shadcn`
Skill details ↗ · shadcn-ui/ui ↗

Architecture & build

1 repo · 5 skills

GITHUB REPOSITORY mattpocock/ **skills** – 5 skills in this theme

SKILL 11 · 1.2M installs
improve-codebase-architecture
Find structural friction and simplify module interfaces.
USE WHEN: Finding structural friction in an existing codebase.
EXAMPLE PROMPT: Find shallow modules and propose a focused refactor.
INSTALL: `npx skills add mattpocock/skills --skill improve-codebase-architecture`
Skill details ↗ · mattpocock/skills ↗

SKILL 12 · 995.5K installs
prototype
Test a design or logic question with a quick prototype.
USE WHEN: Testing one uncertain design or logic decision quickly.
EXAMPLE PROMPT: Build a throwaway prototype to compare these two options.
INSTALL: `npx skills add mattpocock/skills --skill prototype`
Skill details ↗ · mattpocock/skills ↗

SKILL 13 · 889.1K installs
domain-modeling
Sharpen domain terms, glossaries and decisions.
USE WHEN: Clarifying business terminology and domain decisions.
EXAMPLE PROMPT: Sharpen this glossary and challenge ambiguous domain terms.
INSTALL: `npx skills add mattpocock/skills --skill domain-modeling`
Skill details ↗ · mattpocock/skills ↗

SKILL 14 · 862.1K installs
codebase-design
Design testable modules with small, clear interfaces.
USE WHEN: Choosing module interfaces and testable seams.
EXAMPLE PROMPT: Design a small interface that hides this complexity.
INSTALL: `npx skills add mattpocock/skills --skill codebase-design`
Skill details ↗ · mattpocock/skills ↗

SKILL 15 · 784.8K installs
implement
Implement a spec or tickets with checks and review.
USE WHEN: Implementing work described in a spec or tickets.
EXAMPLE PROMPT: Implement this spec, run checks and review the result.
INSTALL: `npx skills add mattpocock/skills --skill implement`
Skill details ↗ · mattpocock/skills ↗

Databases & backend

3 repos · 5 skills

GITHUB REPOSITORY supabase/ **agent-skills** – 2 skills in this theme

GITHUB REPOSITORY prisma/ **skills** – 2 skills in this theme

GITHUB REPOSITORY neondatabase/ **agent-skills** – 1 skill in this theme

SKILL 16 · START PICK · 461.7K installs
supabase-postgres-best-practices
Tune Postgres queries, indexes, schemas and RLS.
USE WHEN: Designing schemas or tuning Postgres performance.
EXAMPLE PROMPT: Review this query, its indexes and its RLS policies.
INSTALL: `npx skills add supabase/agent-skills --skill supabase-postgres-best-practices`
Skill details ↗ · supabase/agent-skills ↗

SKILL 17 · 343.8K installs
supabase
Integrate auth, storage, realtime and database features.
USE WHEN: Integrating Supabase backend services into an app.
EXAMPLE PROMPT: Add Supabase authentication using the existing framework.
INSTALL: `npx skills add supabase/agent-skills --skill supabase`
Skill details ↗ · supabase/agent-skills ↗

SKILL 18 · 391.9K installs
prisma-client-api
Write Prisma queries, relations and transactions.
USE WHEN: Writing Prisma queries, relations and transactions.
EXAMPLE PROMPT: Write a typed Prisma query for these related records.
INSTALL: `npx skills add prisma/skills --skill prisma-client-api`
Skill details ↗ · prisma/skills ↗

SKILL 19 · 390.5K installs
prisma-database-setup
Configure Prisma for your database provider.
USE WHEN: Configuring Prisma for a database provider.
EXAMPLE PROMPT: Set up Prisma for this project and database provider.
INSTALL: `npx skills add prisma/skills --skill prisma-database-setup`
Skill details ↗ · prisma/skills ↗

SKILL 20 · 279.6K installs
neon-postgres
Use serverless Postgres, branching and pooling.
USE WHEN: Connecting an app to Neon serverless Postgres.
EXAMPLE PROMPT: Review the database connection and pooling setup for Neon.
INSTALL: `npx skills add neondatabase/agent-skills --skill neon-postgres`
Skill details ↗ · neondatabase/agent-skills ↗

Agent tools & workflow

5 repos · 5 skills

GITHUB REPOSITORY vercel-labs/ **skills** – 1 skill in this theme

GITHUB REPOSITORY vercel-labs/ **agent-browser** – 1 skill in this theme

GITHUB REPOSITORY mattpocock/ **skills** – 1 skill in this theme

GITHUB REPOSITORY anthropics/ **skills** – 1 skill in this theme

GITHUB REPOSITORY obra/ **superpowers** – 1 skill in this theme

SKILL 21 · 4.1M installs
find-skills
Discover skills that fit the task you are doing.
USE WHEN: Discovering a skill for a specific task.
EXAMPLE PROMPT: Find a suitable skill for auditing this React application.
INSTALL: `npx skills add vercel-labs/skills --skill find-skills`
Skill details ↗ · vercel-labs/skills ↗

SKILL 22 · 1.3M installs
agent-browser
Automate browsing, inspection and UI interactions.
USE WHEN: Automating browser inspection and UI interactions.
EXAMPLE PROMPT: Inspect this page and verify the main user journey.
INSTALL: `npx skills add vercel-labs/agent-browser --skill agent-browser`
Skill details ↗ · vercel-labs/agent-browser ↗

SKILL 23 · 800.4K installs
code-review
Review changes against coding standards and the spec.
USE WHEN: Reviewing changes against standards and a spec.
EXAMPLE PROMPT: Review this diff against the spec and coding standards.
INSTALL: `npx skills add mattpocock/skills --skill code-review`
Skill details ↗ · mattpocock/skills ↗

SKILL 24 · 416.0K installs
skill-creator
Create, evaluate and improve reusable agent skills.
USE WHEN: Creating or improving a reusable agent skill.
EXAMPLE PROMPT: Turn this repeated workflow into an evaluated skill.
INSTALL: `npx skills add anthropics/skills --skill skill-creator`
Skill details ↗ · anthropics/skills ↗

SKILL 25 · 407.0K installs
brainstorming
Explore and validate an idea before implementation.
USE WHEN: Exploring an idea before choosing an implementation.
EXAMPLE PROMPT: Help clarify this product idea and compare approaches.
INSTALL: `npx skills add obra/superpowers --skill brainstorming`
Skill details ↗ · obra/superpowers ↗

Planning & requirements

1 repo · 5 skills

GITHUB REPOSITORY mattpocock/ **skills** – 5 skills in this theme

SKILL 26 · 1.4M installs
grill-me
Stress-test a plan through focused questioning.
USE WHEN: Stress-testing a plan before implementation.
EXAMPLE PROMPT: Question this plan until the important gaps are clear.
INSTALL: `npx skills add mattpocock/skills --skill grill-me`
Skill details ↗ · mattpocock/skills ↗

SKILL 27 · 1.2M installs
grill-with-docs
Challenge the design and record domain decisions.
USE WHEN: Reviewing a plan while recording domain decisions.
EXAMPLE PROMPT: Challenge this design and update the glossary and ADRs.
INSTALL: `npx skills add mattpocock/skills --skill grill-with-docs`
Skill details ↗ · mattpocock/skills ↗

SKILL 28 · 1.1M installs
handoff
Prepare a compact handoff for a fresh agent session.
USE WHEN: Continuing a task in a fresh agent session.
EXAMPLE PROMPT: Prepare a concise handoff with links to current artifacts.
INSTALL: `npx skills add mattpocock/skills --skill handoff`
Skill details ↗ · mattpocock/skills ↗

SKILL 29 · 998.2K installs
triage
Sort issues, reproduce bugs and clarify next actions.
USE WHEN: Turning unclear issues into actionable next steps.
EXAMPLE PROMPT: Triage these bugs and identify what information is missing.
INSTALL: `npx skills add mattpocock/skills --skill triage`
Skill details ↗ · mattpocock/skills ↗

SKILL 30 · 724.5K installs
to-spec
Turn the current context into an implementation spec.
USE WHEN: Turning established context into an implementation spec.
EXAMPLE PROMPT: Write a spec from the decisions already made here.
INSTALL: `npx skills add mattpocock/skills --skill to-spec`
Skill details ↗ · mattpocock/skills ↗

Testing & debugging

3 repos · 5 skills

GITHUB REPOSITORY mattpocock/ **skills** – 2 skills in this theme

GITHUB REPOSITORY obra/ **superpowers** – 2 skills in this theme

GITHUB REPOSITORY anthropics/ **skills** – 1 skill in this theme

SKILL 31 · 1.2M installs
tdd
Build in small, behavior-tested development cycles.
USE WHEN: Building a feature in small, tested behavior slices.
EXAMPLE PROMPT: Implement this behavior with red-green-refactor cycles.
INSTALL: `npx skills add mattpocock/skills --skill tdd`
Skill details ↗ · mattpocock/skills ↗

SKILL 32 · 845.0K installs
diagnosing-bugs
Investigate difficult bugs with a structured process.
USE WHEN: Investigating a difficult or recurring defect.
EXAMPLE PROMPT: Investigate this bug and gather evidence for the cause.
INSTALL: `npx skills add mattpocock/skills --skill diagnosing-bugs`
Skill details ↗ · mattpocock/skills ↗

SKILL 33 · START PICK · 309.2K installs
systematic-debugging
Find the root cause before changing code.
USE WHEN: A bug needs a cause established before a fix.
EXAMPLE PROMPT: Trace this failure to its root cause before changing code.
INSTALL: `npx skills add obra/superpowers --skill systematic-debugging`
Skill details ↗ · obra/superpowers ↗

SKILL 34 · 254.2K installs
verification-before-completion
Require fresh evidence before claiming work is done.
USE WHEN: Checking whether completed work has real evidence.
EXAMPLE PROMPT: Run the relevant checks and report exactly what passed.
INSTALL: `npx skills add obra/superpowers --skill verification-before-completion`
Skill details ↗ · obra/superpowers ↗

SKILL 35 · START PICK · 189.2K installs
webapp-testing
Test local web apps using Playwright scripts.
USE WHEN: Testing a running local web application in a browser.
EXAMPLE PROMPT: Use Playwright to verify this flow and capture failures.
INSTALL: `npx skills add anthropics/skills --skill webapp-testing`
Skill details ↗ · anthropics/skills ↗

Motion & interaction

2 repos · 5 skills

GITHUB REPOSITORY emilkowalski/ **skills** – 4 skills in this theme

GITHUB REPOSITORY remotion-dev/ **skills** – 1 skill in this theme

SKILL 36 · 390.0K installs
emil-design-eng
Improve interaction details and interface feel.
USE WHEN: Improving the feel of interface details and interactions.
EXAMPLE PROMPT: Review this interaction and make it feel more polished.
INSTALL: `npx skills add emilkowalski/skills --skill emil-design-eng`
Skill details ↗ · emilkowalski/skills ↗

SKILL 37 · 258.3K installs
review-animations
Review motion choices, timing and execution.
USE WHEN: Reviewing the quality of existing motion.
EXAMPLE PROMPT: Review the timing, easing and intent of these animations.
INSTALL: `npx skills add emilkowalski/skills --skill review-animations`
Skill details ↗ · emilkowalski/skills ↗

SKILL 38 · 239.2K installs
animation-vocabulary
Turn a described motion effect into the right term.
USE WHEN: Describing a motion effect without knowing its name.
EXAMPLE PROMPT: What is the correct term for this staggered reveal?
INSTALL: `npx skills add emilkowalski/skills --skill animation-vocabulary`
Skill details ↗ · emilkowalski/skills ↗

SKILL 39 · 225.8K installs
improve-animations
Audit animations and plan concrete improvements.
USE WHEN: Turning an animation audit into a practical fix plan.
EXAMPLE PROMPT: Find the weakest motion choices and propose improvements.
INSTALL: `npx skills add emilkowalski/skills --skill improve-animations`
Skill details ↗ · emilkowalski/skills ↗

SKILL 40 · 689.1K installs
remotion-best-practices
Create programmatic video with React and Remotion.
USE WHEN: Building a programmatic video using React.
EXAMPLE PROMPT: Create a reusable Remotion composition for this brief.
INSTALL: `npx skills add remotion-dev/skills --skill remotion-best-practices`
Skill details ↗ · remotion-dev/skills ↗

ZOOM GUIDE

Center: topic → Inner branches: themes → Middle nodes: repositories → Outer nodes: skills and detail

Pinch or zoom in your viewer to read the details. The SVG and PDF retain vector text and lines when enlarged.

Counts retain the original 27 Oct 2026 skills.sh snapshots. Themes, suggested uses, example prompts and START picks are editorial.

A repository may appear under several themes. Zoom reveals detail already included in this map; it does not generate new content.
